

FEEDBACK FROM WORKSHOP FOR OPHTHALMIC BIostatISTICS, LIVERPOOL

11TH MAY 2015

THE ROYAL STATISTICAL SOCIETY GAS & RSS MERSEYSIDE LOCAL GROUP

PARTICIPANTS

WHAT DID YOU LIKE ABOUT THIS MEETING?

- 👁️ Interesting and relevant topics; friendly atmosphere to the meeting
- 👁️ Accessible talks; clinically relevant-well related to clinical outcomes and measures
- 👁️ Diversity of presentations
- 👁️ Few stats equations! Broad range of professionals attending
- 👁️ Convenient location
- 👁️ Good speakers and interesting topics
- 👁️ 3 excellent speakers
- 👁️ Informative
- 👁️ Informative and helpful - will help with stats analysis of my study but also a better understanding of the current literature for my current background search
- 👁️ I'm keen to know how to do statistics properly when I have to use
- 👁️ Rare to have a meeting concentrating on ophthalmic stats
- 👁️ Credible presentation; candid Q&A exchange
- 👁️ Relevant topics
- 👁️ Very well presented and accessible talks
- 👁️ Talks were easy understanding
- 👁️ Update on blood Altman plots
- 👁️ Speakers allowed contributions during talks. Contributions were helpful
- 👁️ Very useful topics and discussions
- 👁️ Insight into statistical thinking from a practicing medical statistician. This practical set of talks was very interesting. Particularly due to all three speakers dealing with a related subject area i.e. ophthalmic
- 👁️ Link between statistics and what it means in practice

WHAT WOULD YOU CHANGE OR WHAT WOULD YOU DO DIFFERENTLY ON THESE MEETINGS (DIFFERENT TOPICS, MORE STATS EQUATIONS)?

💡 Balance between stats/clinical info was good for me, I would find detailed equations difficult to follow.

💡 More on choice of stats tests. Algorithm of best choices.

💡 More stats equation.

💡 Enhance discussions between clinicians-statisticians.

💡 Nothing - a good meeting, maybe a little more time to chat over coffee!

💡 The frequency of the meeting should be increased!

💡 Nicely relevant to a mixed audience. Would be interesting to know about your views on laboratory statistics.

💡 Think again about the icc for agreement measurement.

💡 A bit more advanced statistical methodology topics.

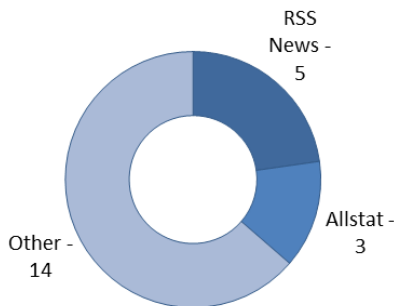

💡 Might benefit from more active ' ??? '

💡 More examples to illustrate talk topics; more on problems encountered during a study and how they were overcome on decisions made how to proceed. There was plenty that was right about the talk.

💡 Could you make the presentations available online, please?

WHERE DID YOU HEAR ABOUT THIS MEETING?

Other:

- colleague
- colleague and ITM newsletter
- email as previously attended a meeting
- email by colleague
- email from branch secretary
- faculty member
- friend
- internal email
- local recommendation
- NIHR
- student IPHS email circulation
- university newsletter
- UoL website
