

# Using The SAIL Databank for RCTs

Ian Farr, Senior Research Analyst

[i.w.farr@swansea.ac.uk](mailto:i.w.farr@swansea.ac.uk)

# SAIL Databank Overview

- **SAIL = Secure Anonymised Information Linkage**
- **Established 2006**
- **Swansea University**
- **Work closely with NHS**
- **Datasets:**
  - Health
  - Demographics
  - Social
  - Disease specific

# SAIL Databank Overview

## Welsh population-based data

5,000,000

10,000,000,000

Pop. 3,000,000

## UK-Wide Collaborations

- Health Data Research UK
- Administrative Data Research Network

# Some Key Linkable Datasets Held by SAIL

## Demographic

ONS

Births

Deaths

## Health

Inpatient Admissions

Outpatient  
Attendances

## Social

Education

Deprivation  
Indices

Welsh  
Demographic  
Service

GP

Disease  
Specific

Disease  
Registers

National Community  
Child Health Database

Emergency  
Dept

Screening  
Services

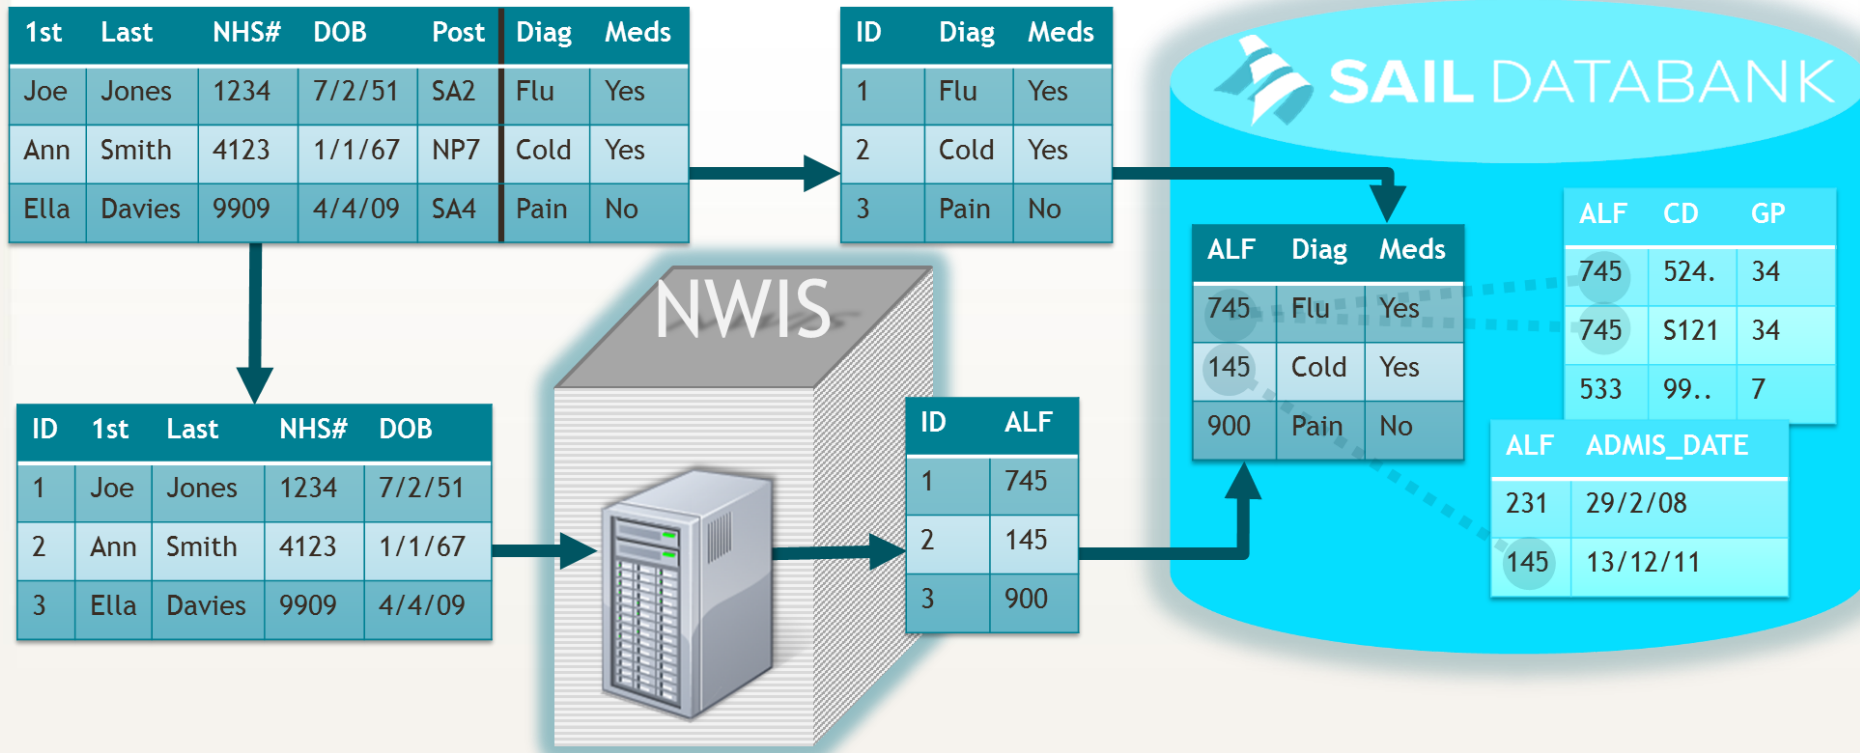

# Data Coverage

- Population Coverage
  - Most datasets: Welsh population coverage
  - GP dataset: partial
    - Practices are data owners, so each must sign up.
    - In SAIL currently: 77% practices covered = 79% population coverage
    - Optional cleaning algorithms to identify record and patient sets e.g.  
<https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0228545>
- Time span
  - Inpatient: 1999- (with ICD10 coding)
  - Outpatient: 2003-
  - GP: varies by practice (plenty of data 2000-)
  - A&E: 2009-
- Updates
  - Most core datasets quarterly.
  - A few datasets have a time lag at source.

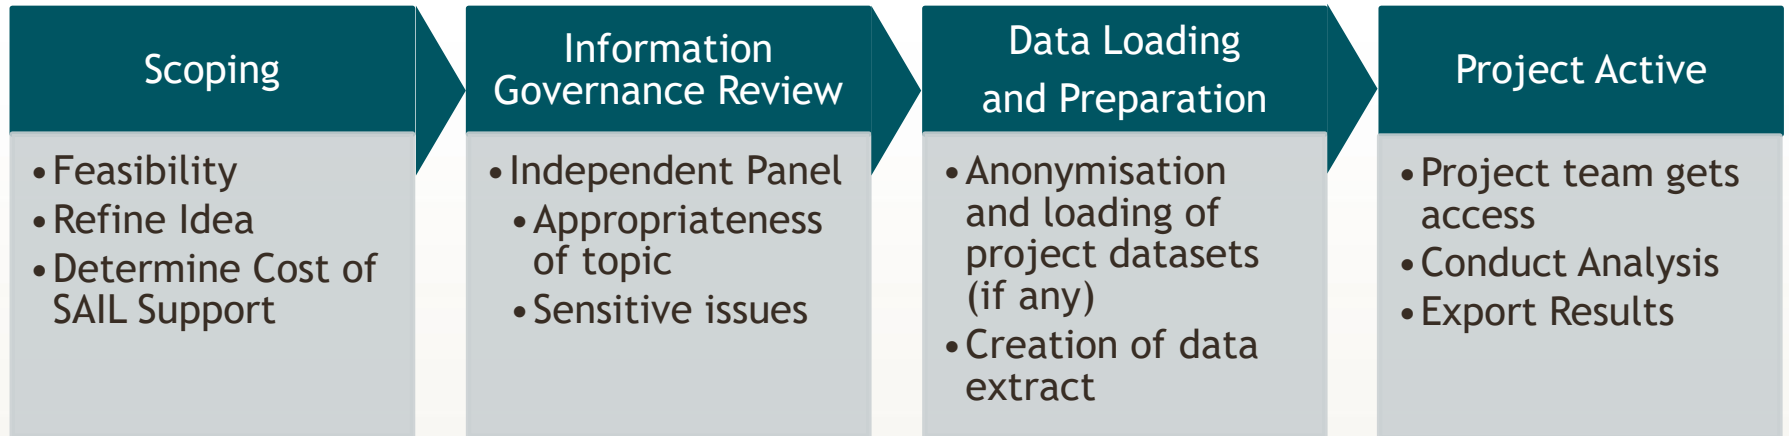

# Governance

- **Anonymisation of data by trusted third party.**
  - Where no NHS number then probability matching applied to derive Anonymised Linking Field (ALF) and there is a field so it is apparent this has been done
- **Independent Information Governance Review Panel (IGRP) considers all applications to use data**
  - Single application to access all SAIL datasets.
- **Projects given access to encrypted extract of the data.**
- **Work carried out in secure remote desktop environment.**
  - Review of all outputs before release.

# Split file process of anonymisation

# The Journey of a SAIL Project

# Who Can Work with SAIL?

- A wide variety of users
  - Academic
  - NHS
  - Government
  - Commercial
- Must be legitimate research with potential for public benefit.
  - Cannot be used for performance management (e.g. league tables of hospital performance).
- Pharmaceutical companies cannot access data directly; work must be done by SAIL or another independent partner.

# Types of Research: Observational Studies

- Purely based on data held in SAIL.
  - EUROmediCAT: the safety of medication in pregnancy
  - Identifying risk factors for Suicide and Self-Harm  
Contributes to <https://adolescentmentalhealth.uk/>
- Importing a cohort of patients and linking to SAIL.
  - Type 1 diabetes and hospital admissions, linking a diabetes register to SAIL.
- Deriving code lists validated from disease registers
  - E.g. <https://www.hdruk.ac.uk/resources/external-validation-of-the-electronic-frailty-index-using-the-population-of-wales-within-the-secure-anonymised-information-linkage-databank/>

# Types of Research: Service Evaluation

- Air AWARE
  - Did an air quality monitoring and alert system in Port Talbot lead to better health outcomes?
- Housing programmes
  - Do programmes such as a home energy efficiency intervention improve health?

# Types of Research: Supporting Health Providers

- Goal: work more closely with NHS to increase the benefit of SAIL.
- Small Business Research Initiative with ABMU
- GP Engagement Project
  - Research supporting GPs in focus areas.
  - Custom reports sent to each practice showing results related to their own practice.

# Types of Research: Clinical Trials

- Supplemental Data
  - Replacing survey data for things like participants' health, health economics, service usage.
- Extended Outcomes
  - PROBAT, study of probiotic supplements in infancy.
    - Extra years of follow-up using routine data.
- Trial Feasibility
  - Potential for easily determining whether patients exist for a clinical trial.

# SAIL Support and Costs

- No charge for data or basic service
- Project-specific support costs only
  - Different Levels of Support
    - Providing the data only
    - Collaborating on analysis
- No charge if the Information Governance Review Panel application is not successful
- Based on three types of projects
  - Academic
  - NHS
  - Commercial

# Thank You
